Other Messages

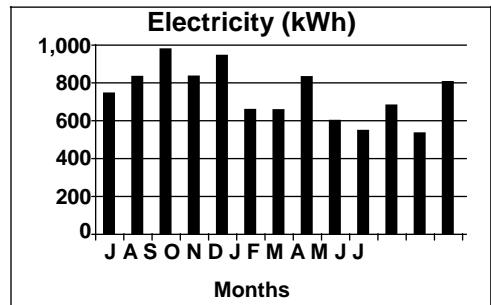

Ontario's Fair Hydro Plan substantially lowers electricity bills for typical residential consumers.

This includes the eight per cent rebate introduced in January 2017, and builds on previous initiatives to deliver broad-based relief on all electricity bills.

Summer Time-Of-Use pricing and hours now in effect May 1. Visit brantfordpower.com for details.

GLOSSARY OF TERMS

TERM

DESCRIPTION

Electricity

This is the cost of the electricity supplied to you during this billing period and is the part of the bill that is subject to competition.

Delivery

These are the costs of delivering electricity from generating stations across the Province to Brantford Power then to your home or business. This includes the costs to build and maintain the transmission and distribution lines, towers and poles and operate provincial and local electricity systems.

A portion of these charges are fixed and do not change from month to month. The rest are variable and increase or decrease depending on the amount of electricity that you use.

The delivery charge also includes costs relating to electricity lost through distributing electricity to your home or business. *Brantford Power collects this money and pays this amount directly to our suppliers.

*When electricity is delivered over a power line, it is normal for a small amount of power to be consumed or lost as heat. Equipment, such as wires and transformers, consumes power before it gets to your home or business.

Regulatory Charges

Regulatory charges are the cost of administering the wholesale electricity system and maintaining the reliability of the provincial grid and include the costs associated with funding Ministry of Energy conservation and renewable energy programs.

Debt Retirement Charge

The debt retirement charge pays down the debt of the former Ontario Hydro.

NOTE: For a detailed explanation of electricity terms, please visit www.brantfordpower.com or www.ontarioenergyboard.ca
